

Meeting 7: Presenting Your Research

Short input, then a practice round
Bachelor Project 2025–2026

Dr. Shreyas Meher
Erasmus University Rotterdam

Thursday 4 June 2026

Today's agenda

1. Where we are
2. The 10-minute presentation: structure and key practices (brief)
3. Practice round: each of you presents a short dry run
4. How the conference is assessed, and how to give feedback
5. Pairs, deadlines, and the Meeting 9 sign-up

Most of today is your practice round. I will keep my input short, then each of you presents a dry run and we give feedback as a group.

Where we are

A7 comes back today with written feedback on Canvas. The calendar from here is tight.

- **Next week is the conference:** Thursday 11 June. Each of you gives a 10-minute presentation, and it is graded.
- **This Tuesday 9 June** you send two files to your paired peer: your slides and your current paper.
- **Today:** a short input from me, then a practice round so you can test your talk before it counts.

The 10-minute presentation

What the presentation must cover

Five things, in this order:

1. The **research question**, and why it matters
2. The **theory and design** behind it
3. How you **collected the data**
4. Your **main findings**
5. The **implications**

It is not a tour of the whole thesis. It is the central argument in compressed form, assessed on clarity and the red thread, not on the volume of content.

A 10-minute structure

Roughly one slide per minute. The findings take two.

Slide	Content	Time
1	Title: your name, thesis title, the RQ in one line	0:30
2	Motivation: the puzzle, and why it matters	1:00
3	Research question and sub-questions	1:00
4	Theory: the one framework you actually use	1:30
5	Method and data: design, case, what you collected	1:30
6–7	Findings: one or two key results, a figure each	3:00
8	The answer to the RQ, and the implications	1:00
9	One take-away, then thank you	0:30
Total		≈10:00

The findings get the most time. Decide your one-sentence take-away first, then build the talk around it.

Best practices: slides and delivery

Slides

- Keywords, not sentences. One idea per slide.
- Put the point of the slide in its title.
- One figure per findings slide: axes labelled, exported clean, no software screenshots.
- Readable from the back: large type, high contrast.

A ready-to-use EUR template, with these timings in the speaker notes, is on Canvas and the course site.

Delivery

- Do not read the slides; speak to the audience.
- Rehearse aloud with a timer. If behind, cut detail, not findings.
- Prepare the opening and the closing in full.
- Finish on your one-sentence take-away.

Your turn: the practice round

Practice round: how it works

The rest of today is your dry run. Low-stakes practice before the graded conference on 11 June.

- Each of you presents a **short version** of your talk: about **five minutes**, finished slides not required.
- Cover the red thread end to end: research question, design, data, your **findings (C4)** and **conclusions (C5)**.
- The group and I give a few minutes of feedback each, using the assessment criteria on the next slide.
- Note where you ran over. That is what to cut before next week.

The aim is to test your structure and timing, not to be polished.

How the conference is assessed

Use the same criteria when you give feedback today

Each item is scored 1 to 5.

Presentation (/25)

1. Research question clearly presented and motivated
2. Concise overview of the design (theory and methods)
3. Findings focused on the main results, relevant to the RQ
4. A clear red thread throughout
5. Good balance between the parts

Peer review (/15)

1. Points out the main strengths
2. Points out the main improvements
3. Suggestions are clear and actionable

Feedback is assessed on its usefulness to the presenter, not on how positive it is. Be specific and propose a concrete fix.

Logistics and deadlines

What is due Tuesday 9 June

- Send your paired peer **two files**: your presentation slides and your current paper.
- You receive theirs in return. Read it, and bring written feedback to the conference.
- The exchange is **mutual**: the person you send to is the person who reviews you, and whom you review.

Important

Deadline to send slides and paper to your peer: Tuesday 9 June. The conference is Thursday 11 June.

Group 16a: pairs

You present Thursday 11 June, 12:30–13:45

You	Send slides + paper to
Kate Domnikova	Lena Minch
Lea Geciova	Pauline Castelein
Vince Kromberg	Bartek Korolec
Francis van Luyn	Lea Capelle

Each pairing is mutual: the peer listed also sends you their paper to review. Email addresses for your partner are on Canvas.

Group 16b: pairs

You present Thursday 11 June, 13:45–15:00

You	Send slides + paper to
Anand Esponda	Ana van Geloven Coello
Kseniya Sidorenko	Darta Plato
Lolo Reysen	Lu Samper Ibars
Daniel Ugarte Valdiviezo	Amalia Krosdorf

Each pairing is mutual: the peer listed also sends you their paper to review. Email addresses for your partner are on Canvas.

Timeline, and the Meeting 9 sign-up

Date	What is due
Tuesday 9 June	Send slides and paper to your paired peer
Thursday 11 June	Conference: 10-minute presentations and peer feedback (graded)
Tuesday 16 June	Draft manuscript due
Thursday 18 June	Individual 1:1 consultations (Meeting 9)
Thursday 25 June	Final thesis, 23:59 (hard deadline)

Important

Before you leave today: confirm your pairing, and sign up for a Meeting 9 consultation slot (sheet on Canvas). Bring your draft manuscript to that slot.
